The Human Body and Seasonal Changes

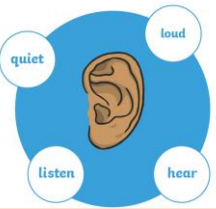

Parts of the Human Body

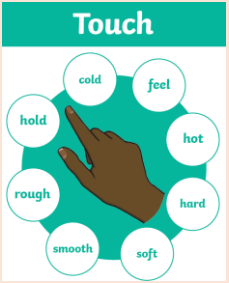

Sight

Hearing

Touch

Smell

Taste

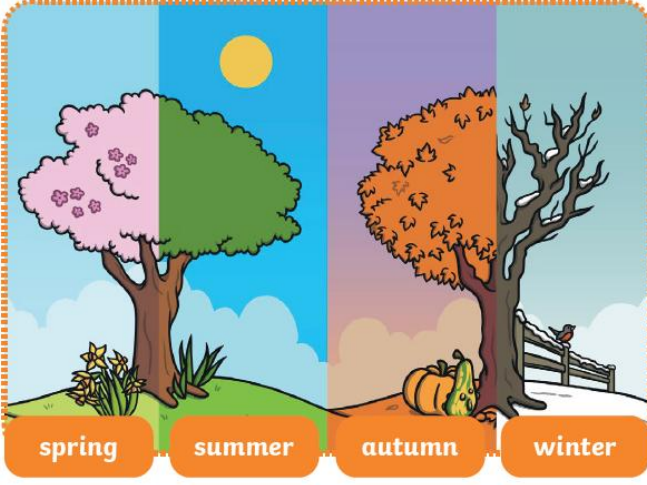

Key Vocabulary

eyes	Eyes are a body part on the face. Humans see with their eyes.
ears	The ear is the body part that humans use to hear sounds.
nose	The nose is the part of the human body that is used to smell.
skin	Skin is what covers your body. You feel and touch with your skin.
tongue	The tongue is the part of the human body that is used to taste.

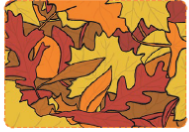

The Four Seasons

In a year, there are four seasons.

spring summer autumn winter

Nature in Autumn

There may be fewer summer flowers and some leaves change colour.

You may see conkers and acorns on the ground.

Some animals, such as squirrels, search for and store food in autumn, ready for winter when they are less active.

Lots of fruit and vegetables are harvested and ready to eat in autumn.

Key Vocabulary

season	a part of the year
autumn	the season before winter and after summer
weather	the conditions of what it is like outside, including rain, snow and how hot or cold it is

rainfall	the amount of rain that falls in a place
daylight	when it is light outside
night	when there is no daylight
rain gauge	an object that is used to collect and measure rainfall
