Safeguarding: 7-minute briefing - Child Sexual Exploitation

Action

Those affected by CSE say that professionals need to prioritise them, to be visibly attentive, responsive and reliable, sticking with them even when this might be difficult. Speak to the Safeguarding Lead in your school.

How to respond

Am I confident in my understanding of the signs and indicators of CSE? How can I build trust with children and young people who have been exploited by adults? How can I create opportunities for disclosure without pressuring victims to disclose before they are ready? How can supervision help me to develop my practice?

Key IssuesChildren often see themselves as making a choice. This can prevent them from seeking support. Understanding the context within which 'choices' are made by victims is critical to respond effectively. The response to CSE requires a shift to viewing parents/carers as partners in the safeguarding process (rather than a source of risk). Safe and consistent relationships are paramount to the promotion of resilience in children & young people

Minute briefing

Recognition

Like any other form of child sexual abuse, CSE:

Can affect any child or young person (male or female) under the age of 18 years, including 16/17 year olds who can legally consent to have sex. Is abuse - even if sexual activity appears consensual Can involve force and/or enticement-based methods of compliance & may/may not, be accompanied by violence or threats of violence. May occur without the child or young person's immediate knowledge (e.g. through others creating videos/ images & posting on social media).

What is it?

CSE is a form of child sexual abuse. It occurs where an individual or group takes advantage of an imbalance of power to coerce, manipulate or deceive a child or young person under the age of 18 into sexual activity (a)in exchange for something the victim needs or wants, and/or (b) the financial advantage or increased status of the perpetrator or facilitator. The victim may have been sexually exploited even if the sexual activity appears consensual. CSE does not always involve physical contact it can also occur through the use of technology.

What is it?

CSE is a terrible crime with destructive consequences for victims, their families, and society. It is not limited to any particular geography, ethnic or social background. Having a shared definition of CSE is critical to identification, monitoring & effective multi-agency responses. The impacts of CSE are wide-ranging, & can be profound & long lasting. This is particularly true when victims do not receive appropriate support. Victims can suffer a range of health impacts including physical injuries, sexually transmitted infections & longer-term gynaecological consequences for females.

Why it matters

Children/Young People can experience emotional trauma/mental illness - depression, self-harm, suicidal ideation, PTSD & drug/alcohol problems.

It also impacts longer-term, being associated with higher rates of youth offending, poor educational prospects, involvement in adult sex work, isolation from family & friends, negative future relationships & increased risk of other forms of violence or abuse.

CSE can also create strong ripple effects on friendship circles, family networks & the wider community.
